Saskatoon, SK

EDUCATION

University of Saskatchewan – Saskatoon, SK Sept. 2022 – Present

- Bachelor of Science (B.Sc) in Computer Science
- Expected Date of Completion: May 2027

EXPERIENCE

Freelance Software Developer Sept. 2024 – Present

Freelance – Remote

- Built and deployed full-stack web applications for startups and local brands with responsive UIs and scalable backends, ensuring solutions aligned with client requirements.
- Integrated secure authentication, payment processing, and admin dashboards, enabling clients to launch production-ready products 30% faster.
- Turned ambiguous client requirements into clear specifications, enabling iterative feature development and on-time delivery in Agile sprints.

Software Developer Intern Jan. 2022 – Aug. 2022

MTN Nigeria – Lagos, Nigeria

- Supported development of internal applications by debugging, testing, and deploying solutions, reducing production issues by 25%.
- Collaborated iteratively with senior developers and product teams to refine solutions, ensuring features aligned with business needs and improved system reliability.
- Automated repetitive IT tasks through scripting, cutting task completion time by 30% and boosting team efficiency.

Landscaper May 2024 – Aug. 2024

Ash & Alder - Saskatoon, SK

- Installed irrigation systems for residential gardens and yards, improving water efficiency by 20% and enhancing plant health.
- Constructed and renovated stone pathways, patios, and ledges, enhancing outdoor aesthetics and usability for homeowners.
- Performed routine lawn and grounds maintenance, ensuring consistently well-kept properties and increasing client satisfaction.

PROJECTS

RedeemOrDie Web App | TypeScript, Node.js, Firebase, Stripe May 2025 – Jun. 2025

redeemordie.com

- Developed a full-stack e-commerce platform for a local streetwear brand, enabling secure online transactions and managing inventory efficiently.
- Integrated payment processing, user authentication, and an admin dashboard, improving operational workflow and reducing manual tasks by 30%.

- Designed a responsive interface with integrated newsletters and contact forms, boosting user engagement.
- Applied Agile practices to manage client feedback and multiple deliverables, ensuring on-time project completion.

Study Hub | Java, Vaadin, Spring Boot, JPA

Jan. 2025 – Apr. 2025

[demolaxbee/Study-Hub](#)

- Built a productivity platform with notes, flashcards, calendar scheduling, and search features to improve study efficiency.
- Tested functionality using JUnit and integration tests, ensuring the platform ran smoothly for all users.
- Implemented relational data persistence with JPA, ensuring data consistency across modules.

CodeQnA | JavaScript, Node.js, React, Docker, MySQL

Sep. 2024 – Dec. 2024

[demolaxbee/programming-forum-app](#)

- Created a channel-driven forum system with RESTful APIs, role-based authentication, and threaded discussions.
- Optimized database operations using Sequelize ORM to improve query efficiency.
- Designed an admin interface with analytics and moderation tools to support community management.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, HTML/CSS, MySQL, PostgreSQL

Frameworks: React, Node.js, Spring Boot, Vaadin, SequelizeORM, JUnit

APIs & Integrations: Stripe, Firebase Auth, Airtable, EmailJS, RESTful APIs, JPA

Developer Tools: Git, Docker, IntelliJ, VS Code, PyCharm, Figma

Concepts: OOP, Design Patterns, UML, Agile, Data Structures & Algorithms
