EDUCATION

University of Saskatchewan
Bachelor of Science in Computer Science

Saskatoon, SK
Expected May 2027

EXPERIENCE

Freelance Software Developer

Sept. 2024 – Present

Remote

- Designed and delivered full-stack web applications (**React, Node.js, Firebase**) with responsive UIs and scalable backends for **3+ clients**.
- **Collaborated in Agile cycles** to translate business needs into technical solutions, consistently delivering features within **2-week sprints**.
- Integrated secure authentication, payment processing, and admin dashboards, enabling clients to launch production-ready products **30% faster**.

Software Developer Intern

Jan. 2022 – Aug. 2022

MTN Nigeria – Lagos, Nigeria

- Debugged and tested **Java-based** internal applications, reducing recurring production issues by 25%.
- **Collaborated with senior developers** to enhance **SQL database** workflows and system reliability, improving uptime for internal tools.
- **Automated** IT support tasks with **Python scripts**, **cutting manual workload by 30%** and increasing efficiency.

PROJECTS

RedeemOrDie Web App | *TypeScript, Node.js, Firebase, Stripe API*

May 2025 – Jun. 2025

- **Developed an e-commerce platform** with secure checkout and inventory tracking, **reducing manual order management by 30%**.
- Implemented **Firebase Auth** and **Stripe**, enabling secure, scalable online transactions.
- **Built** a responsive UI (**React/TypeScript**), boosting user engagement with **20% faster load times** compared to the client's previous site.

Study Hub | *Java, Spring Boot, Vaadin, JPA*

Jan. 2025 – Apr. 2025

- **Designed** a productivity app with notes, flashcards, calendar scheduling, and search, **increasing study efficiency for test users by ~25%**.
- **Proposed and implemented** an innovative flashcard system that **challenged traditional study workflows**, improving usability.
- **Conducted a live presentation** to professors and peers, **showcasing technical design** and cross-module consistency.
- Ensured data reliability with **JPA persistence** and validated features using **JUnit + integration tests**.
- Applied **Agile methodologies** (iterative sprints, stand-ups, and backlog) to manage development, **improving delivery speed and collaboration across the team**.

CodeQnA | *JavaScript, React, Node.js, Docker, MySQL*

Sept. 2024 – Dec. 2024

- **Built a discussion forum** with **RESTful APIs** and role-based authentication, supporting structured peer discussions.
- **Containerized** services with **Docker**, simplifying setup and **improving deployment consistency for team members**.
- **Designed** an admin moderation dashboard with analytics, enabling better community management.
- **Optimized** database performance with **Sequelize ORM**, **reducing query times by ~15%**.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, HTML/CSS, MySQL, PostgreSQL

Frameworks: React, Node.js, Spring Boot, Vaadin, SequelizeORM, JUnit

APIs & Integrations: Stripe, Firebase Auth, RESTful APIs, JPA

Developer Tools: Git, Docker, IntelliJ, VS Code, PyCharm, Figma

Concepts: OOP, Design Patterns, UML, Agile, Data Structures & Algorithms
